Criteria	LLM #1 (ChatGPT)	LLM #2 (Gemini)
Structure	Organized but slightly basic and standard	More structured with better hierarchy and section flow
Clarity	Clear but sometimes repetitive	More concise and precise wording
Formatting	Simple and readable but less refined	Cleaner, more polished, and visually professional
Professional Tone	Formal but slightly generic	More refined, impactful, and job-ready tone
Overall Quality	Good but typical output	Higher quality with stronger presentation and wording

REFLECTION:

The outputs from the two LLMs showed similarities in structure but differed in formatting and wording. One LLM provided a cleaner and more concise format, while the other included more descriptive details in the experience section.

The second LLM performed better in terms of clarity and organization, making the resume easier to read. The first LLM, however, enhanced the descriptions, making the experiences appear more professional and detailed.

In my final resume, I combined the structured format of the first output with the improved wording from the second. I also refined the content to ensure it remained concise while highlighting key skills and experiences.

Through this activity, I learned that prompting plays an important role in generating quality outputs. A clear and complete prompt leads to better and more consistent results. I also learned that AI-generated content still needs human revision to meet professional standards.
